

GEORGE ISHAQ

San Francisco, CA | P: +XXX-XXX-XXXX | ishaq@uni.minerva.edu

EDUCATION

MINERVA UNIVERSITY

Bachelor of Science in Computer Science

Relevant Coursework: Software Engineering; Algorithms; Artificial Intelligence; System Design; Data Structures

San Francisco, CA

Expected May 2026

WORK EXPERIENCE

STEALTH STARTUP (C2C MARKETPLACE, MOBILE-FIRST)

Fullstack Software Engineer Intern

San Francisco, CA

May 2025 – Sep 2025

- Delivered **8 core MVP features** (real-time chat, push notifications, listings, payments) under a tight summer deadline.
- Built a **realtime messaging system** with offline sync and conflict resolution strategies, supporting 1K concurrent users, **designed for 10K+**.
- Implemented **custom payment flows** using Stripe Connect (KYC, conditional fund disbursement, webhook-driven events) with idempotency handling to ensure **correctness under retry and network instability**.
- Built **React Native UI** (browse products, navigation, upload forms, QR scanner) + Flask/Supabase APIs for secure data sync and verification.
- Designed secure PostgreSQL schemas with RLS policies; deployed backend with CI/CD pipelines and monitoring.

HAWSIB

Software Engineer Intern

Bethlehem

Apr 2024 – Sep 2024

- Developed the hit.ps e-commerce web application using Wordpress, HTML, CSS, & Javascript, contributing to a site **generating over \$20K in revenue**.
- **Boosted website traffic** through effective SEO strategies and performance optimization **attracting 100K+ site visits**.
- Engineered a **Python based automation** bot that streamlined product listing processes through API calls; **enhancing listing speed by 50%** and minimizing manual entry efforts across the catalog team.
- Implemented a CMS and instructed 4 non technical employees on managing the site, improving team capability.

MINERVA UNIVERSITY

Cornerstone Curriculum intern

San Francisco, CA

Apr 2023 – Aug 2023

- **Guided 200+ incoming freshmen in Python** fundamentals and data analysis via personalized assessment feedback, weekly interactive sessions, and dedicated office hours; **achieving a 95% pass rate for the course**.
- Authored a retrospective statistical analysis on the effectiveness of the course through statistical testing and regression analysis, influencing curriculum changes for 200+ students and 20+ teachers.

PROJECTS & AWARDS

GameForge (Loom, Git) – Y Combinator AI Coding Agents Hackathon Winner

Aug 2025

- Secured **2nd place overall** + game genesis track winner (100+ teams); judged by YC partners and awarded a **guaranteed YC interview**
- Developed an **AI game-building** platform in 6 hours that enables non-technical creators to **make fun video games by prompting**.

RainForce (Devpost, Git) – Agents in The Loop Hackathon Winner

Aug 2025

- Won **1st place** + N8N track **winner** at the hackathon; also **presented at the N8N SF Community meetup**.
- Engineered a fullstack system using NextJS and N8N to automatically stress test AI agents against prompt injection attacks.

Medibot (Devpost, Git) – Stanford TreeHacks Winner

Feb 2023

- Secured 3rd place in the InterSystems Integrated **Machine Learning** category at **Stanford's TreeHacks 2023** by developing a chatbot to assist up to 40% of the U.S. elderly in communicating with medical professionals.

SKILLS AND CERTIFICATIONS

Languages/Frameworks: Python, Java, JavaScript/TypeScript, C++, React, React Native, Flask, Node.js

Tools/Platforms: AWS (S3, Lambda), Docker, Supabase, PostgreSQL, Stripe, Git

Certifications: CodePath Advanced Technical Interview Prep (2024), Meet @ MIT (2021)
